Dear Jerry:

I recently received your letter regarding the very serious allegations that you have outlined in your previous messages. My office has already met with you on two occasions in December of 2006 and January of this year.

In your messages you note that both the United States Department of Transportation Inspector General and the Federal Bureau of Investigation Public Corruption Unit have been informed of these allegations. I cannot offer additional law enforcement remedy through an in-person meeting, but you may want to consider continuing to seek the assistance of investigative reporters.

I am also aware of the Sunlight Foundation and would be eager to receive any additional materials on its work that you would like to forward for my review.

Sincerely,
Lloyd Doggett
